

SHARE EFFICIENTLY with Canon Solutions America + Box

Canon Solutions America is working with Box,
the cloud-based enterprise content management
platform, to make collaboration easy!

Box is a cloud-based content management and collaboration platform where all work converges to help address simple and complex business challenges around security, access, usage, and internal and external file sharing.

Why do Canon Solutions America and Box make a great pair? Canon Solutions America is bringing a direct connection between select Canon hardware and software and the Box cloud, allowing you to collaborate efficiently and with security features inside and outside of the workplace.

SHARE INFORMATION INSIDE AND OUTSIDE OF YOUR ORGANIZATION

Box offers security features that allow users to more comfortably share crucial business information.

WORK ON A SINGLE DOCUMENT AT THE SAME TIME

Utilizing MS Office 365,* multiple users from virtually any location can open and edit the same document online simultaneously, bringing collaboration to a new level.

COLLABORATE ACROSS THE HALL OR ACROSS THE COUNTRY WITH BOX NOTES

Native to Box, users can quickly take notes, share ideas, and work together on a single platform in real-time from virtually any device that connects to the web, anywhere. Users can create digital whiteboard environments in Box notes that are easy to utilize, organize, and share.

UNLIMITED STORAGE AND FILE TYPE DIVERSITY

Need to view a file, but don't have the native program? Users can view over 100 file types with unlimited content storage in Box.**

* MS Office 365 must be purchased separately.

** Unlimited storage is available with paid Box Business Plus and Enterprise offered by Canon Solutions America.

HOW CAN YOU USE BOX?

Box can be used in the following ways (and then some) to collaborate beyond the status quo:

HAVE CLIENTS?

CREATE: Easily build folders to manage access and grant sharing permissions internally as well as externally to clients so they can submit and review large files that email servers cannot support, potentially without the native software.

WANT TO DIGITIZE?

SCAN AND STORE: Use Canon's document capture software and compatible Canon systems*** to scan invoices, time sheets, inventories, receipts, end-of-day reconciliation reports, and more, directly to your Box folders to help ensure information is managed and security features can be put to use.

NEED MONITORING?

GOVERN: Set rules and permissions to folders and content to monitor usage and help control access. Ensure projects are on track and client or patient information is securely stored and managed appropriately.

LOOKING FOR MORE?

INTEGRATE AND EXPAND: Integrate Box with many of your organization's current technology investments for end-to-end efficiency.****

*** uniFLOW, ADVANCE Cloud Portal and Quick Scan are all Canon software solutions that allow users to scan directly to Box. uniFLOW and ADVANCE Cloud Portal are sold separately. ADVANCE Cloud Portal is compatible on the following Canon imageRUNNER ADVANCE systems: C7500 Series, C5500 Series, C3500 Series, C355iF/C255iF, 8500 Series, 6500 Series, 4500 Series. uniFLOW Capture is compatible on all current Canon MEAP (Multifunctional Embedded Application Platform) enabled devices. Quick Scan is available on the following imageFORMULA scanners: P-215II, DR-C225, DR-C225W, DR-C240, DR-M140, DR-M160II. All devices sold separately.

**** Box has the ability to integrate with over 1,000 applications that most businesses are already working in, including Microsoft Office 365, Salesforce, Okta, and DocuSign.
