Imagine having one platform to drive all communication, making it simpler than ever to get personal with your customers.

EFI MarketDirect is the first integrated platform to enable companies to quickly and easily build and distribute personalized communications across multiple channels. MarketDirect is designed to enable your Marketing and Communication teams to leverage customer data and automate their programs to improve engagement and generate better results with inbound and outbound customer communications and marketing programs.

DATA DRIVEN MARKETING

Today, marketing begins and ends with data. But what good is it if it's too complex to use in your outbound communications? MarketDirect makes it simple to build powerful marketing campaigns around your customer data.

Designing and building campaigns shouldn't require a PhD—but for many solutions it does. Many small to medium businesses have the same marketing needs as larger ones, but don't have the resources to invest in complex and costly enterprise marketing solutions.

MarketDirect enables your content owners and creative teams to build their campaigns quickly and easily—regardless of whether it's an email, website, printed postcard or mobile message.
