

5 reasons for businesses to move to digital fax

Faxing remains a universal method of document delivery with up to

100 billion

faxes sent each year.¹

Not only are organizations still faxing, but usage remains strong:

82%

state that faxing has increased or remained the same during the past year.²

Why businesses rely on fax

- Fax is a trusted and secure point-to-point communication.
- Business processes and workflows rely on fax.
- Fax technology is evolving, and fax servers and cloud fax services are components of modern digital workflows.
- Fax is traceable, and built-in audit trails show when faxes are sent and received.
- Fax transmissions are immune to viruses and malware.

In the age of technology, digital faxing eliminates the pain of manual, paper-based faxing for the digital enterprise and delivers significant cost savings over traditional faxing systems.

44%

say the time spent on paper-based faxing slows employee performance³

39%

find the cost of paper-based faxing is too high⁴

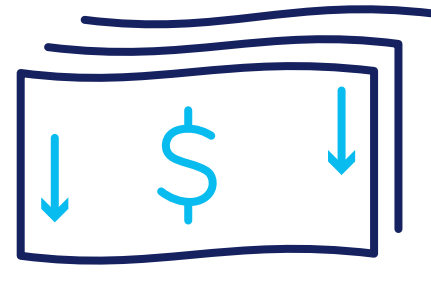

24%

struggle to support high volume faxing⁵

5 reasons to go digital

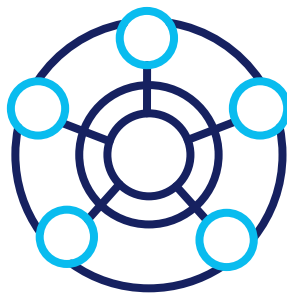

Support enterprise security and corporate, legal, and regulatory compliance

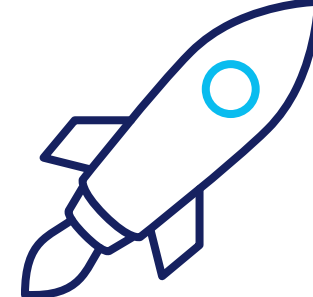

Reduce fax costs significantly by simplifying, centralizing, and automating digital faxing

Integrate with email, making fax easy to use

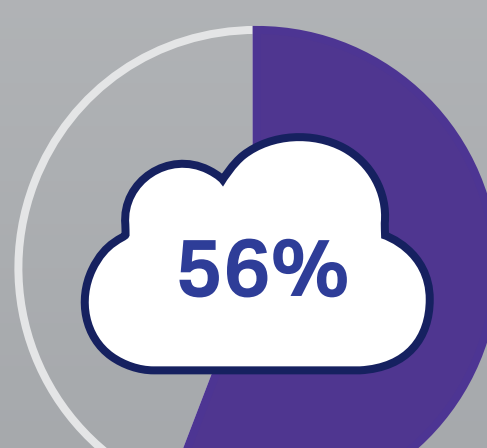

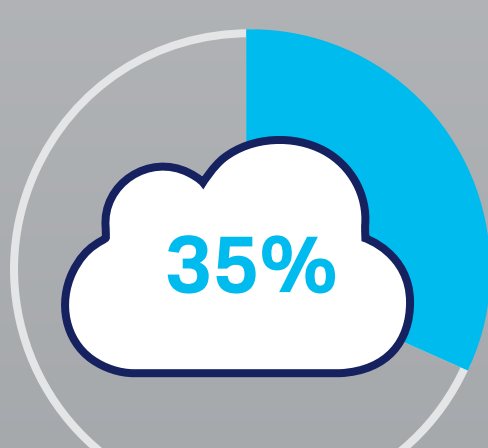

Integrate digital fax solutions with any application or back-end system

Speed up business processes and improve customer satisfaction

More and more organizations are adopting cloud fax to make digital fax even easier.
