CANON SEE IMPOSSIBLE

ROBUST SECURITY IN A COMPACT SIZE

Help keep sensitive healthcare information secure throughout your workflow: from printer and document access to safeguarding pre-printed media

Securing sensitive information is a primary concern for almost every type of business and organization today including, and especially healthcare. Healthcare organizations have a particular responsibility and obligation to protect and secure sensitive information throughout the organization, including both financial information and protected health information (PHI).

With potential risks everywhere, both outside and inside, organizations want to take advantage of tools to help protect their data. The innovative features and easy-to-use functions of the compact imageCLASS printer series can help reduce the risk of information leaks and enhance overall security.

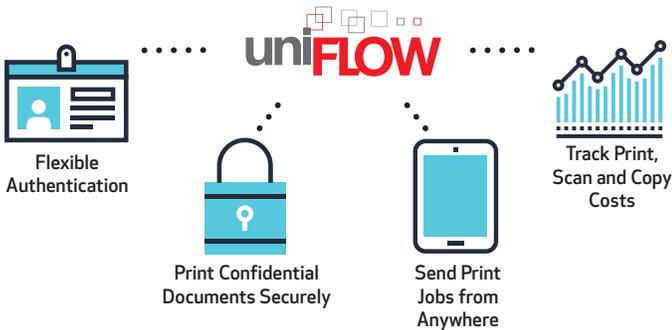

CONTROL ACCESS

Canon Solutions America offers device authentication options for organizations of every size so you can easily enable and restrict user access to critical features and functionality, through authentication and user credentials that are based on the user's role and their need to know.

With our solutions, you control who is authorized to access multifunction devices and desktop printers to print, copy, scan, or send lab requests, reports, charts, and other patient documents. Authentication and access control options include proximity cards or password-based systems.

DOCUMENT MANAGEMENT

Patient records and other sensitive information left on output trays pose potential security risks. Canon Solutions America provides driver-based, serverless, and server-based solutions, such as Secured Print, and uniFLOW Secure Print, to help safeguard printed documents. These solutions make it easy to configure your imageCLASS printers to require user authentication before any document can be printed and retrieved.

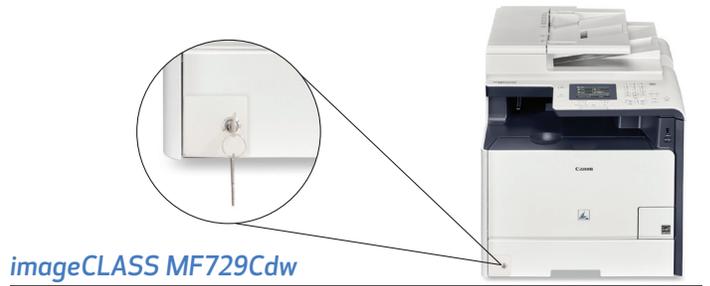

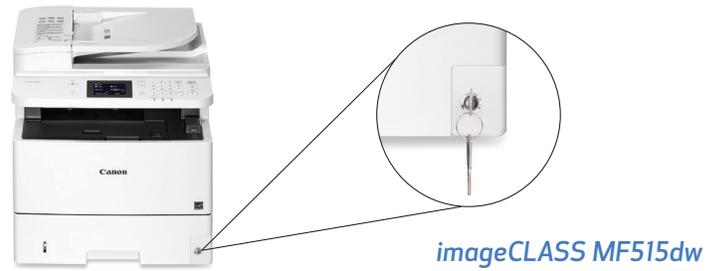

SECURE PRE-PRINTED FORMS

At the printer, locking paper trays can help to deter removal or theft of pre-printed forms, such as pre-printed prescription forms, paper claim forms, and HIPAA forms.

Locking paper trays also help eliminate the need to change the paper or manually feed these forms each time you need to print, which can help enhance day-to-day productivity.

PAPER CASSETTE LOCKS ARE AVAILABLE FOR THE FOLLOWING imageCLASS DEVICES

Locking paper cassettes are also available for select imageRUNNER ADVANCE Series. Contact your Canon Solutions America sales rep to learn more.
